
Care Bridge-Seamless first aids providers for animals

Objective

Our project aims at easing up the jobs of all those Animal Welfare Organizations out there who work hard for providing a better form of living to the street animals in need. It also provides a route for the animals to be able to seek medical help. And all this takes place via the help of users.

Our project thus works as a bridge between the considerate users and two organizations in general i.e. the Welfare Organizations and Hospitals.

How it impacts People's lives

- Care Bridge will help users to connect with the Animal organization directly. As we have mentioned before our service acts as a bridge between the user and the organization/Hospitals. Hence the name

Carebridge.

- Users will be just one tap away from helping the animal they care about.
- Like the time when we needed actual help and had no support, a helping hand like this would've made it a lot easier for us.
- Because of this, we hope that more and more people can get motivated in helping these creatures whom everyone overlook.

Process

1. Capture a picture of the animal
 2. Go on to our website
<https://chaitanyarai.in/project/carebridge/>
 3. Fill out our form with the necessary data in the respective fields
 4. Choose Organization or Hospital based on the condition of the animal
 5. Submit
-
- We also plan to add geo-tagging to our service so that users can easily share the location with us.
